

MARINE CONSULTANT

The Company:

Marico Marine is a leading independent and international marine consultancy working across the ports, shipping, offshore energy, marine engineering, renewables and environmental sectors. With proven knowledge and expertise in the maritime sector; development, safety and regulation, our 'salt and science' approach combines practical marine experience with innovative analysis. The company is located in the tranquillity of the New Forest, near Southampton, UK.

Our clients are ports & harbours, engineering and environmental consultants, infrastructure developers, shipping companies, legal organisations and regulators.

Marico Marine delivers across four key service areas:

- Consultancy: Marine, shipping and navigation studies for design/operation of marine infrastructure. Marine safety and risk assessment services
- Training: Technical safety training
- Software: Web based hazard and incident management software – Hazman II
- Equipment: Integration, supply, installation and support of vessel traffic monitoring solutions and provision of Navicom Portable Pilot Units

Our Consultancy department has grown from its origins in marine and navigation risk and now provides a breadth of shipping and navigation studies to support design and operation of marine infrastructure including EIAs for the marine renewables industry, safety assessments and audits for ports & harbours and oil & gas. We utilise specialist bespoke in-house marine traffic simulation tools and analytical techniques to investigate complex problems. More widely, and drawing on the skills of our team, we provide consenting, hydrographic and dredging advice and have undertaken market analysis, business reviews and master planning for ports and harbours.

The Role:

We are looking to recruit a Marine Consultant to join a busy team of marine professionals based in the New Forest office in Southampton. This is a permanent position with the primary focus of report writing to support navigation risk assessments, vessel traffic surveys and other marine-related reporting deliverables.

You will be working on a diverse range of interesting projects in the ports, shipping, infrastructure development, oil and gas and offshore renewable energy sectors, world-wide, and there will be a requirement to utilise and analyse AIS data and vessel incident data to provide key intelligence to meet client needs. There will also be a requirement to attend and lead stakeholder consultation meetings and workshops with national regulators and local stakeholders, and present findings to regulatory bodies.

Key competencies:

- Technical expertise in an appropriate marine or maritime field
- Proficiency in technical report writing
- Data analysis skills
- Project management & budgeting skills
- Excellent communication and presentation skills
- Experience of responding to invitation to tenders
- Project and academic research skills
- Business development & marketing skills
- Leadership skills
- Self-motivation

Overall, you will be able to demonstrate drive and ambition.

Career progression and responsibility at Marico Marine can be swift depending on capability and aptitude. Opportunities to work overseas, including at our office in Wellington, NZ, is also possible.

Marico Marine is an equal opportunities employer.
